WORK EXPERIENCE

Canonical
Software Engineer

January 2024 - Present

Remote

Savannah Informatics Software Engineer June 2022 - December 2023 Nairobi, Kenya

- Led the design and development of the backend of an Electronic Medical Records and Patient Engagement system (Python, Django, Django Rest Framework, Kubernetes, GCP, Docker, RabbitMQ, Redis, Golang, GraphQL)
- Implemented and designed the company's SMS and USSD API gateway and integrated it with a major Kenyan telecommunications provider, reducing comms costs by ≈40% (Python, Django, Django Rest Framework, GCP, RabbitMQ, Redis, Swagger/OpenAPI documentation)
- Participated in re-platforming existing backend infrastructure from Google Cloud Run to use Google Kubernetes Engine which reduced the company's infrastructure cost by $\approx 55\%$
- Implemented an event-driven usage-based billing module that integrated with prepaid wallets on an internal ERP system
- Optimized existing APIs through application-level caching and query optimization which reduced p95 latency by $\approx 80\%$ (Talk given on Django performance)
- Setup observability to collect metrics and logs using Telegraf, InfluxDB, Grafana, and Sentry for monitoring and error-reporting
- Guided and coached new hires and interns

Savannah Informatics Software Engineer Intern

June 2021 - May 2022 Nairobi, Kenya

- Maintained and developed the Slade360 Electronic Data Interchange system (Python, Django, Django Rest Framework)
- Wrote unit, integration, and end-to-end tests

EDUCATION

University of Nairobi BSc. Computer Science

September 2018 - September 2022 First Class Honours

Relevant coursework: Software Engineering, Distributed Systems, Data Structures and Algorithms, Design Thinking, Systems Analysis and Design, Artificial Intelligence, Machine Learning, Compiler Construction

OPEN SOURCE PROJECTS

Obsidian Spaced Repetition (link)

April 2021 - Present

Spaced Repetition plugin written in TypeScript for the note-taking tool <u>Obsidian</u>. It has been downloaded over 350,000 times and translated into 10+ languages by a global community of users.

Impulse (link)

December 2022 - Present

Impulse is a distributed key-value store written in Golang. It implements various storage engines (Hash Maps, LevelDB, LSM Trees, B Trees), replication, range queries, chaos testing, and data sharding.

Elixir (link) December 2021 - May 2022

Elixir is a distributed electronic health records system written in Python/Django and JavaScript/Svelte.

SKILLS

Programming: Python (Django, DRF, Celery), Golang, GraphQL, SQL, TypeScript, JavaScript, HTML/CSS, Rust

 $\textbf{Infrastructure:} \ \ \text{Kubernetes, Google Cloud Platform, Docker, PostgreSQL, Redis, RabbitMQ}$

Observability: Grafana, Telegraf, InfluxDB, Sentry

CI/CD: Gitlab CI/CD, GitHub Workflows, Helm, Ansible
